(\$13.00 VALUE)

### Special Features

- Odorless (No PVC)
- Wide spectrum of adhesion
- High-build, non-sag, and short cut-off string
- Bonds and seals simultaneously
- Very fast curing through volume
- Easily tooled, brushed, and smoothed to recreate texture
- Capable of withstanding high dynamic stresses
- Permanently flexible

**Polymix PX.4001** is a one-part, very fast curing, polyurethane elastic adhesive and sealant designed for industrial assembly and car body construction and repair. It's known for its outstanding high-build properties, which result in a perfect viscosity for sealing and bonding. Thanks to its special formulation, it is completely odorless. The product can be easily brushed and tooled in order to match the original mark and give original equipment appearance to the seam.
